WRAP CARE OPTIONS

KEEP YOUR SHINE & YOUR TIME

AG can come to you to keep your wrap looking like the day it was done.

FLEET MAINTENANCE

Our focus is to make sure your investment is cared for properly to make it last.

BOOK YOUR APPOINTMENT TODAY:
757.548.5255 | AGWRAPS.COM

CERAMIC COATING

Long lasting coating that creates a super slick finish allowing for easier dirt removal and helps maintain the "wet" look.

BOOST SPRAY

Helps to boost the gloss that the wrap already has adding a thin coating making care easier than on a non-coated vehicle.

MOBILE WASH & WAX

Our certified mobile team knows what it takes to clean and care for the wrap properly with no damage to our investment.

LONG-TERM DURABILITY STARTS WITH SELF-CARE

Whether AG takes care of your wrapped vehicle or you decide to do yourself this is what you need to know.

WARRANTY

AGWraps warranties vehicle wrap installations for one year from the date of install. If there are any defects due to installation (*wrinkles, bubbles, peeling, etc.*) during the first year, we will repair or replace the wrap under warranty. Most wrap vinyls have a manufacturer warranty of 3 years for horizontal surfaces and 5 years for vertical surfaces. **All window film is not covered by our installation warranty, and most films carry a 1-3 year manufacturer warranty.** Please check with us if you're interested in more information on your wrap's warranties!

CLEANING

Wrap films may be cleaned the same as a professional paint job with cleaning products and detergents used for normal car maintenance. Nevertheless, always be careful when cleaning. Use an average water pressure at a distance of at least 20" and never exceed a water temperature of 95°F (35°C).

CAUTION

The film should not be cleaned for at least 7 days after installation. Doing so may cause an alteration of the adhesive which may result in the film lifting.

Solvents and corrosive detergents **will** damage your wrap! AGWraps is **not** liable for any wraps cleaned with unspecified additives from cleaning stations.

CAR WASHES

AGWraps always advises **hand-washing your wrap.** Additives and the rotating brushes from car washes can harm the appearance of the graphics and the film itself. **It is a fact that after 10 car washes, polyurethane becomes streaked.** Car washes can do the same thing to wrap films for which AGWraps is not liable.

RECOMMENDED

AGWraps recommends using 3M wrap maintenance products for cleaning your wrap. These products are available for purchase in the AGWraps showroom. We also have wrap care packages available.

PRO TIP

Always test a small section of the surface before cleaning the entire wrap.

CERAMIC COATING TREATMENT OPTIONS

*CERTIFIED BY 3M | CERAMIC

PREMIER \$760

- Application of **two full layers** of 3M™ Ceramic Coating PN39901
- Lasts up to 5 years*
